

LEED for ALL

Principles of Sustainability and Green Building

An engaging, non-technical two-day workshop on the principles of sustainability and green building. Become conversant in LEED, corporate sustainability, climate literacy and more, without the technical rigor or commitment of an exam prep class.

RTKL Miami - Photo: Greg Hamra

- Understand **corporate sustainability & CSR** principles
- Articulate **the business case** for sustainability
- Communicate sustainability principles **with credibility**
- Bolster your level of **climate literacy**
- Apply **triple-bottom-line** thinking and doing
- Contrast the **big changes in LEEDv4** vs LEEDv2009
- Help influencers make more **informed decisions**
- Speak **the language of LEED** w/accuracy and understanding

We'll discuss **Climate Change: Impacts, Band-Aids & Solutions** including a politically viable, market-based solution to GHG reduction endorsed by economists and scientists.

Get guidance to attend **Climate Leadership** training with:
